

www.pinpointbuddy.com

Seamless navigation that utilizes the buddy system and augmented-reality technology on your phone or tablet to provide guidance inside buildings.

Say goodbye to frustration finding store products and hello to effortless indoor navigation.

Pinpoint is in proof-of-concept development lead by CU Denver faculty members:
Caroline Clevenger, Bing Han, Kendall Hunter, Morris Huang
US Provisional Patent App No. 63/557,171

- Buddy system locates places or target objects
- Directional arrows guide you toward indoor destinations
- Does not require special or expensive equipment
- Designed to support individuals living with cognitive disabilities
